CYBER SECURITY 1 MONTH INTERN LOG SHEET

Session No.	Topic Covered	Key Activities / Learning Description	Date	Signature
1	Introduction to Cyber Security	Overview of cyber security, importance, real-world cyber incidents, career opportunities		
2	Cyber Security Concepts	CIA Triad, threat, vulnerability, risk concepts discussion		
3	Basics of Computers	Hardware, software, operating systems fundamentals		
4	Networking Basics	LAN, WAN, IP addressing, ports and protocols		
5	Internet Fundamentals	TCP/IP model explanation and practical understanding		
6	DNS & Web Protocols	DNS working, HTTP vs HTTPS practical comparison		
7	Cyber Threat Landscape	Malware types: virus, worm, trojan, ransomware		
8	Phishing & Social Engineering	Identifying phishing emails and prevention methods		
9	Types of Hackers	White hat, black hat, grey hat hackers case study discussion		
10	Attack Lifecycle	Phases: reconnaissance, scanning, exploitation, maintaining access		
11	Cyber Laws & Ethics	IT Act overview, cyber ethics and legal responsibilities		
12	Case Study Discussion	Analysis of real-world cyber attack incidents		
13	Windows Security Basics	User accounts, password protection, Windows security features		
14	Windows Firewall & Updates	Configuring firewall and importance of system updates		
15	Linux Introduction	Linux OS basics and interface overview		
16	Linux Commands Practice	Essential commands: ls, cd, mkdir, rm, pwd		
17	Linux File Permissions	chmod, file ownership, user groups practical		
18	User & Access Management	Authentication vs authorization concepts		
19	Multi-Factor Authentication	Working of MFA and practical examples		

20	Security Policies	Password policies, patch management, backup strategies		
21	Virtualization Concepts	Introduction to VirtualBox		
22	Kali Linux Setup	Installing and configuring Kali Linux in VirtualBox		
23	Network Devices	Routers, switches, firewalls explanation		
24	Network Architecture	Basic network structure and communication flow		
25	Practical Lab Session	Hands-on practice of Linux & Windows security configurations		
26	Security Best Practices	System hardening and basic defensive strategies		
27	Project Discussion	Project requirement explanation and planning		
28	Project Implementation	Practical execution and documentation preparation		
29	Project Submission	Final project submission and presentation		
30	Internship Review & Certification	Final assessment, feedback session, internship completion & certificate issuance
