PHOENIX SOLUTIONS
LET'S SHINE TOGETHER

CYBER SECURITY 3 MONTHS INTERN LOG SHEET

Week	Day	Activity / Work Done
Week 1	Monday	Introduction to internship program and overview of cyber security concepts
Week 1	Tuesday	Study of cyber security importance and digital threats
Week 1	Wednesday	Analysis of real-world cyber incidents
Week 1	Thursday	Understanding cyber security career paths
Week 1	Friday	Discussion and revision of cyber security fundamentals
Week 2	Monday	Basics of computer systems and digital infrastructure
Week 2	Tuesday	Study of computer hardware components (CPU, RAM, Storage)
Week 2	Wednesday	Understanding computer software and operating systems
Week 2	Thursday	Identification of system vulnerabilities
Week 2	Friday	Practical discussion on system components and security
Week 3	Monday	Introduction to networking and communication between devices
Week 3	Tuesday	Understanding network infrastructure and devices
Week 3	Wednesday	Study of types of networks (LAN, WAN, MAN)
Week 3	Thursday	Importance of networking in cyber security
Week 3	Friday	Networking discussion and learning activities
Week 4	Monday	Introduction to IP addressing
Week 4	Tuesday	Types of IP addresses and addressing concepts
Week 4	Wednesday	Understanding ports and network services
Week 4	Thursday	Internet fundamentals and connectivity
Week 4	Friday	Understanding DNS and how the internet works
Week 5	Monday	Study of OSI model and layered communication
Week 5	Tuesday	Understanding TCP/IP model
Week 5	Wednesday	Domain Name System (DNS) working process
Week 5	Thursday	HTTP protocol and web communication
Week 5	Friday	HTTPS and secure web communication
Week 6	Monday	Introduction to cyber threat landscape
Week 6	Tuesday	Study of malware and malicious software
Week 6	Wednesday	Understanding phishing and social engineering attacks
Week 6	Thursday	Study of ransomware attacks
Week 6	Friday	Discussion on cyber threats and prevention

Week 7	Monday	Understanding hackers and their motivations
Week 7	Tuesday	Types of hackers (white hat, black hat, grey hat)
Week 7	Wednesday	Study of cyber attack lifecycle
Week 7	Thursday	Cyber laws and ethics
Week 7	Friday	Information Technology Act and legal responsibilities
Week 8	Monday	Introduction to operating systems and system security
Week 8	Tuesday	Understanding CIA triad (Confidentiality, Integrity, Availability)
Week 8	Wednesday	Study of user accounts and system trust model
Week 8	Thursday	Principle of least privilege
Week 8	Friday	Privilege escalation and security risks
Week 9	Monday	Windows security fundamentals
Week 9	Tuesday	User Account Control (UAC)
Week 9	Wednesday	Windows firewall and traffic filtering
Week 9	Thursday	Importance of system updates and patching
Week 9	Friday	Introduction to Linux in cyber security
Week 10	Monday	Study of basic Linux commands
Week 10	Tuesday	Authentication methods and identity verification
Week 10	Wednesday	Authorization and access control
Week 10	Thursday	Multi-factor authentication (MFA)
Week 10	Friday	Password policies and system hardening
Week 11	Monday	Introduction to virtualization concepts
Week 11	Tuesday	Setup of VirtualBox and Kali Linux environment
Week 11	Wednesday	Network devices: router, switch, firewall
Week 11	Thursday	Network security concepts and defenses
Week 11	Friday	Packet analysis and introduction to Wireshark
Week 12	Monday	Project topic selection and planning
Week 12	Tuesday	Project development and implementation
Week 12	Wednesday	Project testing and analysis
Week 12	Thursday	Project documentation preparation
Week 12	Friday	Final project completion and submission
