CLOUD COMPUTING

30-DAY TRAINING LOG SHEET

Day	Date	Topics Discussed / Covered / Tasks	Supervisor Signature
1		Introduction to Cloud Computing, Evolution of Cloud Computing	
2		Cloud Characteristics and Benefits	
3		Cloud Service Models (IaaS, PaaS, SaaS)	
4		Cloud Deployment Models (Public, Private, Hybrid, Community)	
5		Virtualization and Hypervisors	
6		Resource Pooling, Elasticity, Scalability and Multi-tenancy	
7		Cloud Providers Overview (AWS, Azure, GCP, OCI)	
8		Cloud Networking Basics (IP Addressing, DNS)	
9		CDN, Load Balancing and Internet Gateways	
10		Amazon EC2 and Compute Services	
11		Azure Virtual Machines and Google Compute Engine	
12		Cloud Storage (Object, Block and File Storage)	
13		Amazon S3, EBS and EFS	
14		Virtual Private Cloud (VPC)	
15		Subnets and Route Tables	
16		NAT Gateway and Internet Gateway	
17		Security Groups and Network Configuration	
18		Identity and Access Management (IAM)	
19		IAM Users, Groups, Roles and Policies	
20		Permissions and Access Control	
21		Amazon CloudWatch	
22		CloudTrail and Azure Monitor	
23		Infrastructure as Code (IaC) Concepts	
24		Cloud Databases (RDS, DynamoDB)	
25		Cloud SQL and NoSQL Databases	
26		Web Application Hosting	
27		Application Deployment Basics	
28		Serverless Computing (AWS Lambda, Azure Functions)	
29		Practical Session and Module Revision	
30		Assessment and Progress Review/Internship Project
