CLOUD COMPUTING

60-DAY TRAINING LOG SHEET

Day	Date	Topics Discussed / Covered / Tasks	Supervisor Signature
1		Introduction to Cloud Computing, Evolution of Cloud Computing	
2		Cloud Characteristics and Benefits	
3		Cloud Service Models (IaaS, PaaS, SaaS)	
4		Cloud Deployment Models (Public, Private, Hybrid, Community)	
5		Virtualization and Hypervisors	
6		Resource Pooling, Elasticity, Scalability and Multi-tenancy	
7		Cloud Providers Overview (AWS, Azure, GCP, OCI)	
8		Cloud Networking Basics (IP Addressing, DNS)	
9		CDN, Load Balancing and Internet Gateways	
10		Amazon EC2 and Compute Services	
11		Azure Virtual Machines and Google Compute Engine	
12		Cloud Storage (Object, Block and File Storage)	
13		Amazon S3, EBS and EFS	
14		Virtual Private Cloud (VPC)	
15		Subnets and Route Tables	
16		NAT Gateway and Internet Gateway	
17		Security Groups and Network Configuration	
18		Identity and Access Management (IAM)	
19		IAM Users, Groups, Roles and Policies	
20		Permissions and Access Control	
21		Amazon CloudWatch	
22		CloudTrail and Azure Monitor	
23		Infrastructure as Code (IaC) Concepts	
24		Cloud Databases (RDS, DynamoDB)	
25		Cloud SQL and NoSQL Databases	
26		Web Application Hosting	
27		Application Deployment Basics	
28		Serverless Computing (AWS Lambda, Azure Functions)	
29		Practical Session and Module Revision	
30		Assessment and Progress Review	

Day	Date	Topics Discussed / Covered / Tasks	Supervisor Signature
31		REST APIs and API Gateway	
32		API Integration	
33		Docker Fundamentals	
34		Docker Images and Containers	
35		Docker Hub and Container Lifecycle	
36		Scalability and High Availability	
37		Fault Tolerance	
38		Cost Optimization Techniques	
39		Cloud Security Fundamentals	
40		Shared Responsibility Model	
41		IAM Security Best Practices	
42		Multi-Factor Authentication (MFA)	
43		Principle of Least Privilege	
44		Encryption at Rest	
45		Encryption in Transit	
46		Key Management	
47		Backup and Recovery	
48		Firewalls and Security Groups	
49		Network ACLs	
50		VPN and Bastion Hosts	
51		DevOps Fundamentals	
52		Git and GitHub	
53		Jenkins	
54		GitHub Actions	
55		Continuous Integration (CI)	
56		Continuous Deployment (CD)	
57		Terraform Basics	
58		AWS CloudFormation	
59		Infrastructure Automation Practical	
60		Internship Project
